

### Sub phase-2 Data flow diagram

|               |                       |
|---------------|-----------------------|
| Date          | 28-09-2026            |
| Team ID       | SWTID-2026-7624       |
| Project name  | Script-controlled ACL |
| Maximum marks | 4 marks               |

#### Data Flow Diagram

The Data Flow Diagram represents the movement of information between the user, ServiceNow application, ACL scripts, and Institution Details database.

#### Level 0 – Context Level

User → ServiceNow System → ACL Security Layer → Institution Details Table

The user sends an access request to the ServiceNow system. The system verifies the user's role and evaluates the ACL conditions before providing access to the required records.

#### Level 1 – Data Flow

1. User enters login credentials.
2. ServiceNow authenticates the user.
3. User requests access to Institution Details.
4. System identifies the user's role.
5. Script-Controlled ACL evaluates the access request.
6. Branch and role conditions are checked.
7. Access is either granted or denied.
8. Authorized records are displayed to the user.

#### Data Flow

User

ServiceNow Authentication

Role Identification

Script-Controlled ACL

Role & Field Validation

Access Decision

Access Granted

Access Denied

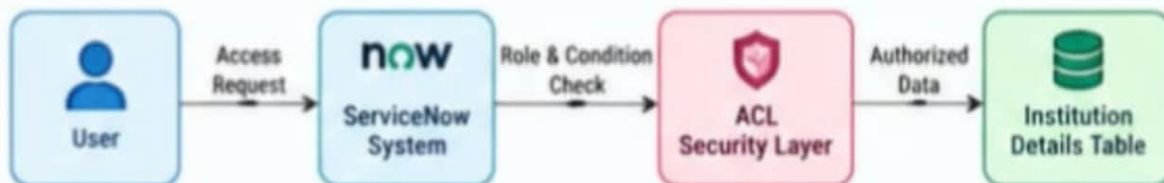

Institution Details Records

## 2. Data Flow Diagram

The Data Flow Diagram represents the movement of information between the user, ServiceNow application, ACL scripts and the Institution Details database.

### Level 0 – Context Level

### Level 1 – Data Flow

1. User enters login credentials.
